Categories

A	92.5%
C	82.5%
E	65%
N	52.5%
O	70%

The O Score:

O stands for openness. People who are high in openness are creative, imaginative, and open-minded. They find routines dull, and they are always ready for the next adventure. In the workplace, employees that are high in openness tend to engage in theoretical, strategic work. They tend to be extremely intelligent, and they enjoy tackling new challenges.

30%-47.4%: You have an analytical mind, and you tend to be very pragmatic in your thinking.

47.5%-64.9%: You an adventurous, open-minded side to you, but you still tend to be very down-to-earth.

65%-82.4%: You are an innovative individual, but you need some stability in your life to feel at ease.

82.5%-100%: You are highly creative, and you're easily bored with routine. You thrive in dynamic environments, and you enjoy difficult challenges.

The C Score:

C stands for conscientiousness. If you're high in conscientiousness, you are highly self-disciplined. You enjoy rules and traditions, and you pay close attention to detail. Chances are, you work very hard, and you're rewarded for your dedication, punctuality, and precision.

30%-47.4%: You find it hard to stick to routines and follow through on tasks.

47.5%-64.9%: You generally fulfill your responsibilities, but you find routine to be dull and you think that rules are sometimes made to be broken.

65%-82.4%: Your colleagues and supervisor know they can rely on you to get the task done, but you're not so attached to tradition that you're unable to change.

82.5%-100%: You find comfort in rules and company procedures, and you always get your work done ahead of time. You work very hard in and outside of the office, and you're always careful to check over your work twice.

The E Score:

E stands for extraversion. People who are extraverted enjoy being in the company of others. They usually work well in teams, and they enjoy socializing. Introverted people find social events exhausting. They like working independently, and they find small talk difficult.

30%-47.4%: You are very introverted. You work best alone, and you need to make sure you make time for yourself throughout the day.

47.5%-64.9%: You enjoy the company of others, but you still find that you need some time alone after working very closely with colleagues.

65%-82.4%: You generally prefer to work in teams if given the choice. You're cheerful and friendly, and you make friends easily.

82.5%-100%: You're the life of the party. People love spending time with you because you're open, warm, and talkative.

The A Score:

A is for agreeableness. People who are high in agreeableness are caring and empathetic toward others. They are usually willing to compromise for others, and for better or worse, they often put others needs in front of their own.

30%-47.4%: You are low in agreeableness. You always stand up for your own interests, and you can dole out criticism without worrying about the other person's emotions. When you speak to others, you always speak directly and assertively.

47.5%-64.9%: You generally speak out for what you believe in, but you know when to hold your tongue because you are careful not to hurt those around you who may be more sensitive

than you are.

65%-82.4%: You are always willing to lend a helping hand or a listening ear to your colleagues when they need help.

82.5%-100%: You generally put others' needs above your own, and you're willing to rearrange your schedule if your supervisor asks you. You don't always assert your needs, and sometimes people take advantage of you because you're so accommodating.

The N Score:

N stands for neuroticism. Neuroticism is associated with high levels of negative emotions including stress, anxiety, sadness, fear, self-consciousness, and anger.

30%-47.4%: You are a fairly stable individual. While you experience some highs and lows, you don't sweat the small stuff because you know how to put your problems in perspective.

47.5%-64.9%: Your friends know that you're a generally stable person, but you can't help but worry when things don't go according to plan. When problems do arise though, you know how to cope with stress and anxiety in a healthy way.

65%-82.4%: You have a fairly happy outlook on life, but you tend to worry about the future more than you should. You're a bit too critical of yourself, and you find that you have the blues more often than your friends do.

82.5%-100%: You have fairly dramatic mood swings, and you spend a great deal of time consumed by anxiety about the future. You're rarely satisfied with your life, and you find that it's difficult for you to manage negative emotions.
